EXPERIENCE

Reynolds and Reynolds Sales Leadership Institute — College Station, TX
Office Assistant — Aug 2025 – May 2026

- Coordinated logistics for 6+ employer recruiting and professional development events annually, supporting 500 + students and collaborating with 100+ employer partners to ensure successful program execution
- Analyzed program and event data in Excel and Qualtrics, tracking performance metrics and maintaining accurate records to support planning decisions
- Synthesized program results into year-end reports for leadership, identifying performance trends to inform future event planning

Texas A&M Athletics x Mays Business School — College Station, TX
Teaching Assistant, Amplify U Program — Jan 2026 – May 2026

- Supported instruction for a cohort of 18 NCAA Division 1 student-athletes by grading assignments, providing individualized feedback, and coordinating course materials and program logistics
- Developed instructional content, presentations, and multimedia resources to enhance student engagement and support the delivery of professional development curriculum
- Partnered with faculty to manage course operations, track student progress, and improve the delivery and organization of educational programming

Cobalt Construction — Laredo, TX
Marketing Intern — May 2024 – Aug 2024

- Analyzed social media engagement trends and audience response to recommend content adjustments supporting marketing efforts
- Collaborated with project and operations teams to align marketing content with company priorities

ACADEMIC PROJECTS

Underground Transit Consulting Project, Mays Business School — Jan 2026 – May 2026

- Designed and distributed a Qualtrics survey to 156 Texas A&M stakeholders and conducted 26 interviews to assess transportation behavior, demand, and interest in a proposed transit system
- Cleaned and standardized survey data in Excel through an extract, transform, and load process before analysis and visualization
- Built an interactive Tableau dashboard examining travel time, congestion, adoption likelihood, and willingness to pay; found that 62% of respondents had missed a campus bus
- Synthesized survey and interview findings into a phased implementation recommendation; more than 80% of respondents said the proposed system would be convenient
